OMNIAQUARTZ

OMNIA QUARTZ is a meticulously curated line of Natural Quartz Sufaces, comprised of 4 Collections ranging from sleek solid colors to timeless and unique marble-inspired designs. Created with the highest grade of quartz mineral and advanced polymer resin, combined with the latest compression technology. Omnia Quartz is engineered to be the best of its kind.

COMPACT

Quartz surfacing is a conglomerate of resin and up to 93% refined quartz mineral, one of the hardest minerals available, making each slab non-porous and highly durable. Meaning your countertops will be stain-resistant, scratch-resistant, and etch-resistant to acid. Sealants are not required for added durability.

VERSATILE

Our marble-inspired slabs are book-matched (BM) to allow veins to flow continously across surfaces - from kitchen countertops to wall accents and shower cladding. Our slabs are also available in 2 different finishes - honed and polished, allowing for boundless design possibilities.
