OMNIAQUARTZ

2021 COLLECTION

Design, texture, and colors are more important today than ever before when designing the perfect space. Whether it is your home, your office, or your business getting the right balance of the different design elements can make all the difference.

That's why we are introducing 8 new colors for this year - so you have the right tools to create the environment you deserve.

From the new ultra-realistic marble-look design in “Birch” to the modern and cool tones and textures in “Cauldia”, there is a color for every taste. We hope you enjoy the design process as much as we enjoyed creating these colors for you.

To learn more about the new colors, please visit our website **www.omniaquartz.com**.
